Union*

LETTER FROM THE EDITORS

Congratulations Class of 2016 on our graduation from The Cooper Union! As a class, we have experienced some of the most intense times of transition in the history of The Cooper Union, from the loss of free-tuition, to the tumultuous Dean changes in all three schools, and our current situation without a permanent president. But with change, also comes opportunity. Traditionally, this page of the yearbook is dedicated to a message from the president, but with the current state of the school, we thought it best to speak to our peers directly. Our professors, the institution, and even other students have tested us throughout our time here. Through these changes, we have remained strong and learned from our actions and those of others. We recognize and have started to adapt to the differences between creative and logical minds, and all of us have become stronger for our understanding, or at least respect, of how others think. This is a special experience at The Cooper Union, in which people of all different beliefs and backgrounds can have productive discussions. We urge everyone to take these skills into the future with them, as we are actually quite lucky to have experienced these obstacles at a young age. I know that everyone in the Cooper community is looking forward to the return to a free-tuition model and we hope that in the future you remember everything that The Cooper Union has given to you, as one of the last remaining classes receiving full-tuition scholarships. As students graduating into the professional world, we are in a time of transition; just like our school, we are filled with hope and uncertainty. We have been told time and time again that if you can get through Cooper, you can get through anything. As cliché as it sounds, now is the time to take chances, go for what you want, and not let anyone hold you back. If there is anything we have learned at The Cooper Union, it is to stand up for what you truly believe in and, to allow yourself the freedom to change your goals and opinions. Darwin taught us that the only way to survive in this world is to adapt. We know that Peter Cooper would be proud of the student body's commitment to his mission and please join us in making a personal promise to keep that dream alive, as we move on to our next step in life. Our wish is that in years to come, you remember where you came from and how Cooper taught you strength and perseverance. Lucky for us, no matter what is happening at The Cooper Union or in our personal futures, we have a formidable leader to guide us in our endeavors, Peter Cooper.

Your Cable 2016 Team,
Alexa Reghenzani & Antonia Stoyanovich
